

FOCUS ON EYE HEALTH

Start Your Kids Off With a Bright Future

An Eye Exam May Help Your Child See the World More Clearly.

Vision plays an important role in a child's physical, cognitive and social development. As a first step to assessing your child's vision, pediatricians and school nurses offer vision screenings. School vision screenings miss vision issues as often as 75% of the time, making important to schedule a vision care exam for your child¹.

Things an Eye Doctor is Assessing During a Vision Care Exam²

- Visual Alignment** Addressing any visual alignment issues such as strabismus or amblyopia early on is key. Once diagnosed, your child's eye doctor can determine the best plan for treating or correcting the problem.
- Prescription Changes** Annual vision care exams will ensure your child's vision prescription is up-to-date and set them up for a successful school year.
- Eye Conditions** Vision care exams are essential for assessing the eyes and eyelids for any abnormalities and symptoms of eye conditions.

Vision Disorders Diagnosed in Children Through a Vision Care Exam³

Myopia "Nearsightedness" <ul style="list-style-type: none"> Close objects appear clear. Distant objects appear blurry Impacts nearly 9% of children ages 5 to 17 	Hyperopia "Farsightedness" <ul style="list-style-type: none"> Distant objects appear clear. Close objects appear blurry. Impacts nearly 21% of children 6 months - 6 years 	Astigmatism <ul style="list-style-type: none"> General blurry vision Impacts 15-28% of children ages 5 to 17
Amblyopia "Lazy Eye" <ul style="list-style-type: none"> Most common cause of vision loss in children Impacts 2% of children ages 6 - 72 month 	Strabismus <ul style="list-style-type: none"> Misalignment of the eyes that can cause Amblyopia Impacts 2-4% of children 6 years old 	Vision Loss <ul style="list-style-type: none"> Almost 3% of children younger than 18 are blind or visually impaired and have trouble seeing with glasses

Did You Know?

The economic cost of children's vision disorders amount to \$10 billion yearly in the U.S.⁴

45% of costs associated with children's vision loss is shouldered by families⁴

Diagnosing Childhood Vision Problems⁵

It is recommended that children have eye exams at six months old, at age 3, before starting school and then every year following.

Symptoms of Vision Issues Include⁶:

- Frequent eye rubbing or blinking
- Struggling to read up-close
- Headaches caused by squinting
- Excessive head tilting to one side or the other
- Wandering or crossed eyes
